SKILLS

- **Programming:** Python, Java
- **Web Technologies:** HTML5, CSS3, JavaScript

PROJECT'S

Project Title: Personal Portfolio Website

Technology: React.js, HTML5, CSS3, JavaScript

- Designed and developed a personal portfolio website to showcase my profile, technical skills, projects, and learning journey.
- Built reusable React components for major sections including navigation, hero, about, skills, projects, contact, and footer.
- Implemented a responsive design optimized for desktop, tablet, and mobile screen sizes.
- Translated the UI design into a functional React application while maintaining consistent layout, typography, spacing, and visual hierarchy.

STRENGTHS & WEEKNESSES

Strengths

- **Problem Solving** – Enjoy finding practical solutions to technical challenges.
- **Quick Learning** – Comfortable learning new concepts and technologies.
- **Teamwork** – Able to collaborate and contribute effectively in team environments.
- **Communication** – Able to explain ideas clearly and listen to others.
- **Adaptability** – Comfortable adjusting to new tools, technologies, and situations.
- **Creativity** – Enjoy designing and experimenting with new ideas.

Weaknesses

- **Limited Industry Experience** – As a student, I am still developing real-world industry exposure.
- **Still Exploring My Career Direction** – I am exploring different areas of technology to identify where I can contribute and grow the most.
- **Over-Focusing on Details** – Sometimes I spend extra time refining my work, and I am learning to balance quality with deadlines.
